Glycemic Index Food Guide

The glycemic index (GI) is a scale that ranks a carbohydrate-containing food or drink by how much it raises blood sugar levels after it is eaten or drank. Foods with a high GI increase blood sugar higher and faster than foods with a low GI.

There are three GI categories:

<table>
<thead>
<tr>
<th>Color</th>
<th>Description</th>
<th>GI Range</th>
<th>Choose Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>Low GI (55 or less)</td>
<td>(55 or less)</td>
<td>Choose Most Often</td>
</tr>
<tr>
<td>Yellow</td>
<td>Medium GI (56 to 69)</td>
<td>(56 to 69)</td>
<td>Choose Less Often</td>
</tr>
<tr>
<td>Red</td>
<td>High GI (70 or more)</td>
<td>(70 or more)</td>
<td>Choose Least Often</td>
</tr>
</tbody>
</table>

A low GI diet may help you:
- decrease risk of type 2 diabetes and its complications
- decrease risk of heart disease and stroke
- feel full longer
- maintain or lose weight

Try these meal planning ideas to lower meal GI:
- Cook your pasta al dente (firm). Check your pasta package instructions for cooking time.
- Make fruits and milk part of your meal plate (Figure 1). These foods often have a low GI and make a healthy dessert.
- Try lower GI grains, such as barley and bulgur.
- Pulses can be grains and starches or meat and alternatives. Swap half of your higher GI starch food serving with beans, lentils or chickpeas. For example, instead of having 1 cup of cooked short grain rice, have ½ cup of cooked rice mixed with ½ cup of black beans.

Diabetes Canada recommends choosing lower GI foods and drinks more often to help control blood sugar.

Work with your Registered Dietitian to add foods and drinks to your lists, create action plans that include choosing lower GI foods, adapt your favourite recipes, and find ways to swap/substitute low GI foods into your meal plan.

Checking your blood sugar before, and 2 hours after, a meal is the best way to know how your body handles certain foods and drinks.

Figure 1: The Plate Method. Using a standard dinner plate, follow this model to control your portion sizes. www.diabetes.ca/mealplanning

Some carbohydrate-containing foods and drinks have so little carbohydrate that they do not have a GI value. This does not mean they cannot be included as part of a healthy diet. Examples include green vegetables, lemons, and some low-carbohydrate drinks. Diabetes Canada calls these foods and drinks “free” because they do not impact the blood sugar of people living with diabetes. You can put free foods in the green category, but they do not have a GI and have not been included in the food lists.

Items with this symbol are “sometimes foods” (foods and drinks eaten only on occasion)
### Grains and Starches

#### Low Glycemic Index (55 or less)
Choose Most Often

- **Breads:**
  - Heavy Mixed Grain Breads
  - Spelt Bread
  - Sourdough Bread
  - Tortilla (Whole Grain)

- **Cereal:**
  - All-Bran™ Cereal
  - All-Bran Buds™
  - With Psyllium Cereal
  - Oat Bran
  - Oats (Steel Cut)

- **Grains:**
  - Barley
  - Bulgur
  - Mung Bean Noodles
  - Pasta (Al Dente, Firm)
  - Pulse Flours
  - Quinoa
  - Rice (Converted, Parboiled)

- **Other:**
  - Peas
  - Popcorn
  - Sweet Potato
  - Winter Squash

---

#### Medium Glycemic Index (56 to 69)
Choose Less Often

- **Breads:**
  - Chapati (White, Whole Wheat)
  - Flaxseed/Linseed Bread
  - Pita Bread (White, Whole Wheat)
  - Pumpernickel Bread
  - Roti (White, Whole Wheat)
  - Rye Bread (Light, Dark, Whole Grain)
  - Stone Ground Whole Wheat Bread
  - Whole Grain Wheat Bread

- **Cereal:**
  - Cream of Wheat™ (Regular)
  - Oats (Instant)
  - Oats (Large Flake)
  - Oats (Quick)

- **Grains:**
  - Basmati Rice
  - Brown Rice
  - Cornmeal
  - Couscous (Regular, Whole Wheat)
  - Rice Noodles
  - White Rice (Short, Long Grain)
  - Wild Rice

- **Other:**
  - Beets*
  - Corn
  - French Fries
  - Parsnip
  - Potato (Red, White, Cooled)
  - Rye Crisp Crackers (e.g. Ryvita Rye Crispbread™)
  - Stoned Wheat Thins™ Crackers

---

#### High Glycemic Index (70 or more)
Choose Least Often

- **Breads:**
  - Bread (White, Whole Wheat)
  - Naan (White, Whole Wheat)

- **Cereal:**
  - All-Bran Flakes™ Cereal
  - Corn Flakes™ Cereal
  - Cream of Wheat™ (Instant)
  - Puffed Wheat Cereal
  - Rice Krispies™ Cereal
  - Special K™ Cereal

- **Grains:**
  - Jasmine Rice
  - Millet
  - Sticky Rice
  - White Rice (Instant)

- **Other:**
  - Carrots*
  - Potato (Instant Mashed)
  - Potato (Red, White, Hot)
  - Pretzels
  - Rice Cakes
  - Soda Crackers

---

*Some fruits have not been assigned a GI because they contain less than 15 g of available carbohydrate per serving (e.g. lemon and lime).*

*Most starchy/sweet vegetables (e.g. peas, parsnip, winter squash) provide 15 g or more carbohydrate per 1 cup serving. Beets and carrots often provide less than 15 g carbohydrate per serving (marked above with *). Most non-starchy (or free) vegetables (e.g. tomato and lettuce) have not been assigned a GI because they have very little carbohydrate and have very little effect on blood sugar.*
Grains and Starches

Fruits

Low Glycemic Index (55 or less) Choose Most Often

- Apple
- Apricot (Fresh, Dried)
- Banana (Green, Unripe)
- Berries
- Cantaloupe
- Grapefruit
- Honeydew Melon
- Mango
- Orange
- Peach
- Pear
- Plum
- Pomegranate
- Prunes

Additional foods:
1.
2.
3.

Medium Glycemic Index (56 to 69) Choose Less Often

- Banana (Ripe, Yellow)
- Cherries (Bottled)
- Cherries (Fresh)
- Cranberries (Dried)
- Figs (Fresh, Dried)
- Grapes
- Kiwi
- Lychee
- Pineapple
- Raisins

Additional foods:
1.
2.
3.

High Glycemic Index (70 or more) Choose Least Often

- Banana (Brown, Overripe)
- Watermelon

Additional foods:
1.
2.
3.

Some fruits have not been assigned a GI because they contain less than 15 g of available carbohydrate per serving (e.g., lemon and lime).

Many fruits and vegetables fall in the low or medium GI categories.
## Meat and Alternatives

Meat, poultry and fish do not have a GI because they do not contain carbohydrate. When ½ cup or more of pulses are eaten, they can be included in the Grains and Starches food group or the Meats and Alternatives group.

Diabetes Canada is making the invisible epidemic of diabetes visible and urgent. Eleven million Canadians have diabetes or prediabetes. Now is the time to End Diabetes - its health impacts, as well as the blame, shame and misinformation associated with it. Diabetes Canada partners with Canadians to End Diabetes through education and support services, resources for health-care professionals, advocacy to governments, schools and workplaces, and funding research to improve treatments and find a cure.
